EXECUTIVE SUMMARY

1.0 BACKGROUND

1.1 Introduction

Globally, the world has made incredible progress against malaria. But we are still too far from the end point we seek: a world free of malaria. Every year, the global tally of new malaria cases exceeds 200 million; and every 2 minutes, a child dies from this preventable and treatable disease. The damage inflicted extends far beyond loss of life: malaria takes a heavy toll on health systems, sapping productivity and eroding economic growth. Ultimately, investing in universal health care is the best way to ensure that all communities have access to the services they need to beat malaria. Individual and community empowerment through grassroots initiatives like “Zero malaria starts with me” can also play a critical role in driving progress.” (World Malaria Report,2018.)

After more than a decade of steady advances in fighting malaria, progress has levelled off. According to WHO’s 2018 World malaria report, no significant gains were made in reducing malaria cases in the period 2015 to 2017. The estimated number of malaria deaths in 2017, at 435 000, remained virtually unchanged over the previous year.

The African Region continues to shoulder more than 90% of the global malaria burden. Worryingly, in the 10 African countries hardest hit by malaria, there were an estimated 3.5 million more cases of the disease in 2017 over the previous year.

In Nigeria, malaria constitutes a major public health problem accounting for 25% of under-5 mortality and 30% childhood mortality and 11% maternal mortality. At least 50% of the population will have at least one episode of malaria annually while children that are aged below 5 years (about 24 million) will have 2 to 4 attacks of malaria annually. The economic cost of malaria, arising from cost of treatment, loss of productivity and earning due to days lost from illness, may be as high as 1.3% of economic growth per annum. The disease is the major cause of poor child development. Increasing resistance to hitherto cost-effective treatment has added to the burden.

The Abuja declaration of the African Summit on Roll Back Malaria which held on the 25th April, 2000 was signed by all the Heads of States. The meeting committed them to an intensive effort to halve the malaria mortality in Africa through implementation of strategies and activities agreed upon at the summit.

The leaders at this summit also decided that 25th April of each year be commemorated as Africa Malaria Day, now World Malaria Day (**WMD**) with effect from the 60th session of the World Health Assembly (**WHA**).

The World Malaria Day provides the opportunity for the global and health communities to intensify their efforts in providing access to affordable, safe and effective anti-malarial combination treatments worldwide, as well as protective insecticide treated nets and other preventive measures.

The “Zero malaria” campaign – first launched in Senegal in 2014 was officially endorsed at the African Union Summit by all African Heads of State in July 2018. It engages all members of society: political leaders who control government policy decisions and budgets; private sector companies that will benefit from a malaria-free workforce; and communities affected by malaria, whose buy-in and ownership of malaria control interventions is critical to success.

On World Malaria Day 2019, WHO joined the RBM Partnership to End Malaria, the African Union Commission and other partner organizations in promoting “Zero malaria starts with me,” a grassroots campaign that aims to keep malaria high on the political agenda, mobilize additional resources, and empower communities to take ownership of malaria prevention and care.

1.2 Objectives of World Malaria Day

- To remind governments, partners and stakeholders of their commitments and obligations to the Abuja targets;
- To create awareness about the disease and the devastating impact it has on the lives of more than five (5) million people nationwide

- To sensitize individual and cooperate bodies on the need to mobilize domestic financing in the fight against malaria
- To encourage multi-sectoral collaborations in the fight against the disease e.g. Ministries of Health, Education, Information, Women Affairs, Water Resources and Environment; and among all tiers of government;
- To integrate relevant programmes such as Maternal Newborn and Child Health, Reproductive Health, Immunizations Primary Health Care and Health Promotion so as to foster popular education, build on the knowledge that people have on malaria to address issues that are relevant to them in controlling the disease;
- To advocate for policies and strategies that promote the early recognition of symptoms and treatment for all, especially in children and pregnant women; and lobby government and other partners for the provision of affordable Insecticidal Treated Nets for the vulnerable groups.

1.3 Significance of World Malaria Day Commemoration

The World Malaria Day marks the anniversary of a historic occasion which provides an opportunity for governments and their Partners to rededicate themselves to the spirit of the Abuja Summit and the fight against the disease. The theme for World Malaria Day 2019 is: "**Zero Malaria Starts with Me**" and the accompanying slogan is: "**Join Me**".

This year's commemoration marks an important milestone in the continental efforts at combating the disease. It is aimed at increasing awareness and mobilizing the entire Nigerian population on the availability and access to prevention and appropriate treatment of malaria using the recommended drugs (ACT) and testing before treatment using RDT or microscopy.

2.0 METHODOLOGY

2.1 WMD Planning Meetings

The WMD meeting is a very important forum to discuss and plan the implementation of the World Malaria Day Celebration which is marked on the 25th of April, every year.

The 2019 WMD commemoration began with an inaugural meeting on the 14th February, 2019. This was followed by several planning meetings to ensure quality preparations before the events. The seven standing sub-committees were mandated to come with implementable activities for the year's commemoration. The terms of reference were clearly spelt out for each sub-committee and members were allowed to work at sub-committee level according to their area of comparative advantage. Over the years, the World Malaria Day commemoration has always been private sector-driven with Partners taking the lead. 2019 was not an exception.

Several meetings held to prepare for the day are reflected in table 1.

Table 1: Schedule of Meetings

2.2 WMD Theme & Slogan

The theme for the 2019 WMD which is "**Zero Malaria Starts With Me**" as usual was gotten from WHO Headquarters in Geneva and adopted as national theme. Nigeria, just like other malaria endemic country adopted the theme with a view to formulating her own slogan which is country specific to match the theme.

During the preparatory meetings, several slogans were considered and a decision was reached to use the slogan that was unanimously accepted by the Planning Committee members which was "**Join Me**".

2.3 WMD Sub-Committees & TOR

In order to ensure a smooth planning and execution of 2019 WMD, six sub-committees was formed. Memberships for these committees were drawn from the NMEP, Staff of Federal line Ministries, Agencies and Departments. Further representations were drawn from a broad based pool of the RBM partnership which includes development/funding partners, the organized private sector and representatives of Press/media organizations. Each committee commenced planning in line with its terms of reference (TOR) and were charged with the responsibility of providing periodic feedback to the central planning committee. The under-listed are the sub-committees and their TORs

Table 2: WMD Sub-committees and TORs

S/N	SUB-COMMITTEE	TOR
1.	Venue & Exhibition	<ul style="list-style-type: none"> ▪ Develop and submit a costed work plan ▪ Arrange exhibition for WMD ▪ Identify, secure and prepare Venue ▪ Contact all exhibitors ▪ Coordinate ushers ▪ Liaise with other sub-committees as required

		<ul style="list-style-type: none"> ▪ Submission of report
2.	Publicity	<ul style="list-style-type: none"> ▪ Develop and submit a costed work plan ▪ Develop IEC materials ▪ Liaise with other sub-committees as required ▪ Carry out media/Press activities ▪ Liaise with other sub-committees a required ▪ Coordinate malaria news and features ▪ Submission of report, photographs & video CDs
3.	Advocacy & Social Mobilisation	<ul style="list-style-type: none"> ▪ Develop and submit a costed work plan ▪ Establish social media presence ▪ Plan, identify and carryout advocacy visits for WMD ▪ Liaise with other sub-committees a required ▪ Organize educational competition for schools ▪ Mobilize women and communities for malaria awareness activities ▪ Submission of report
4.	Finance & Resource Mobilization	<ul style="list-style-type: none"> ▪ Develop and submit a costed work plan ▪ Ensure that activities are funded (follow up with funders) ▪ Mobilize financial resources for WMD ▪ Identify, communicate, and ensure full participation of potential funders ▪ Liaise with other sub-committees as required. ▪ Submission of reports
5.	Security & Medicals	<ul style="list-style-type: none"> ▪ Develop and submit a costed work plan ▪ Safeguard the property of the companies invited for exhibition ▪ Ensure that pandemonium is avoided ▪ Maintain peace and tranquillity ▪ Secure properties ▪ Provide securities for rallies and other events ▪ Liaise with other sub-committees as required.

		<ul style="list-style-type: none"> ▪ Submission of reports ▪ Provide medical services
6.	Social Media Campaign	<ul style="list-style-type: none"> ▪ Use NMEP web-site to publicize the WMD. ▪ Create a Mascot ▪ Use Facebook, Twitter, Instagram or any social-media platform to create awareness on Malaria. ▪ Liaise with other sub-committees as required ▪ Open a whatsapp group chat
7.	State Support	<ul style="list-style-type: none"> ▪ Collate reports from states on their implementation challenges. ▪ Come up with a concept note for NMEP on the challenges from State and proffer solutions ▪ Liaise with other sub-committees as required ▪ Provide technical support to the States for the WMD

2.3 Scope of 2019 WMD Activities

The scope was informed by the theme and slogan of the 2019 WMD which is “Zero Malaria Begins With Me”; & the Slogan which also is “Join Me respectively. This called for unity of purpose and collaboration of partners and stakeholders especially governments at all levels (State and LGA) including related parastatals, communities and individuals. This is further buttressed in WHO message to nations for the 2019 WMD commemoration as thus;

The commemoration of the 2019 World Malaria day marked a critical moment in time. Since 2000, malaria-affected countries and their development partners have made remarkable progress in reducing the total number of malaria cases and deaths”.

They were also of the view that: the toll of malaria remained unacceptably high; every two minutes, a child dies of this preventable and treatable

disease; and each year, more than 200 million new cases of the disease are reported. (World Malaria Report,2018)

3.0 2019 WMD Activities – National and Sub-National Levels

The Planning committee held series of meetings prior to D-day and a consensus was reached by members hence the following activities were earmarked for implementation by the WMD Committee at the National level. The celebrations at the state levels are to be conducted independent of the national due to considerations, peculiarities and funds made available to malaria by their respective States.

Theme:- “Zero Malaria Starts with me” Slogan “Join Me”

3.1 Pre-WMD Press Briefing

The WMD pre-press briefing took place on the 29th of February, 2019 at NMEP Conference room, 1st floor Abia House, Central Business District, Abuja at 10.00am. Though the first of its kind in the history of WMD celebration it added glamour to the preparation. The well attended event aimed at information dissemination, awareness creation and sensitization on the huge burden of malaria in Nigeria. This was supplemented by development of a press statement, content placement on national dailies (Punch & Thisday newspapers), and coordination of malaria news. These highlighted key activities that were planned as part of the commemoration of this year's WMD.

The pre-press briefing was well attended by personnel from the print and electronic media amongst whom were:-FRCN, Kapital FM, Voice of Nigerian, Daily Trust, This Day, NAN, Armed Forces Radio, Sun, Plus TV, Apo Radio/TV, Vanguard, Guardian, Punch, TVC, AIT, Media Concept, Radio Nigeria TV Kaftan, Silver bird TV, Wazobia, Kaftan Newspaper, Plateau News, News diary, CAN, and FMoH Press. Malaria partners also attended the event. It also worthy of mention that the pre-press briefing resulted in the broadcast of malaria messages in almost all the national dailies and media houses and live coverage of the Wassa IDP camp visit on Apo Radio/TV. It also set the pace for the media coverage of the other WMD activities particularly the grand finale road walk and ministerial press conference on the 25th of April.

A cross section of participants at the Pre-Press-briefing held on the 29th February at NMEP Conference room.

3.2 Internally Displaced Person (IDP) Camp Visit

The WMD Planning Committee visited the IDP camp Wassa, Kabusa Abuja on the 16th of April, 2019. The aim of the visit was to sensitize the inhabitants of the camp on the efforts of the government to eliminate malaria because of the negative impact of the disease. Also the committee was at the IDP camp to mobilize the populace of Wassa towards marking the 2019 World Malaria Day as well as to stress the importance of keeping their environment clean and sleeping inside LLINs every night to prevent malaria. There they carried out mass-diagnosis of malaria as well as distribution of LLINs to pregnant women and children under 5 years of age. Those whose RDT results were positive were treated with ACTs.

Members of the Planning committee at Wassa IDP camp led by the NC-NMEP and others.

3.3 Advocacy Visits to Places of Worship

As part of activities slated for the 2019 WMD, the planning committee paid advocacy visits to the two places of worship (Church & Mosque) representing the dominant religions in the country. The aim was to sensitize worshipers on the need to use proven interventions (LLINs, environmental sanitation,

indoor-residual spraying, amongst others) to ensure malaria elimination. There was also distribution of free LLINs to pregnant women and children under 5 years.

The advocacy team to the National Mosque Abuja handing over LLINs to be distributed to pregnant women and children under 5 years. The team was led by the Head PM-NMEP

In the same vein also, the team went to the United Evangelical Church at Plot 46 Dan-Suliema Street, Off Ngozi Okonjo -Iweala Street Utako After the Market to carry out its sensitization and LLINs distribution activity.

The beneficiaries of the free LLINs distribution at the 2019 WMD church service and the net hanging demonstration by the advocacy team

3.4 Grand Finale

The 2019 World Malaria Day grand finale commenced with a road show/rally. The event, which was flagged-off by the HMH ably represented by the Director Public Health Department, Dr. Evelyn Ngige, took-off from FMOH headquarters, Federal Secretariat Complex, Phase 3, en-route Shehu-Shagari way and terminated at Barcelona Hotels, 23 Blantyre Street Wuse 11, Abuja the venue for the ministerial press-briefing.

The Director of Public Health Department Dr. Evelyn Ngige, with some of the participants during the rally.

The DPH-FMOH, National Coordinator NMEP, The Chairman 2019 WMD and some participants during the rally.

The HMH, the chairman 2019 WMD, some members of the press and participants at the rally.

3.4.1 Opening Remarks

The opening remarks was given by the chairman 2019 WMD planning committee, Dr. Uzodinma Adirieje. In his remarks he acknowledged the remarkable progress made in the efforts to eliminate malaria but pointed out that Nigeria still accounts for 25% of the world's malaria cases. He went further to state that government had deployed various interventions which are proven to be the best health investments of our time to curtail the menace of malaria. He pointed out that zero malaria remains our major goal, and can be realised with our collective commitment . Finally, he urged all present to re-dedicate themselves to malaria elimination by:

- ❖ making the fight against malaria a priority as a shining example for others to emulate;
- ❖ supporting/committing to Nigeria's investments and actions in fighting malaria through the World Malaria Day Planning Committee, National Malaria Elimination Programme (NMEP), Federal Ministry of Health and Partners;

- ❖ spreading information and awareness about malaria prevention, care, treatment, support, impact mitigation, activism and need for sustainable citizens' participation everywhere; and
- ❖ signing up and acting as champions in the fight against malaria in Nigeria.

The Chairman 2019 WMD Planning Committee, Dr. Uzodinma Adirieje delivering his welcome remarks

3.4.2 Goodwill messages

3.4.3 Ministerial Press- Briefing

The Honourable Minister of Health, Professor Isaac Adewole, FRCOG, DSc (Hon) expressed his delight to address the press on the auspicious occasion as the commemoration of the 2019 WMD with the theme: "Zero Malaria Begins with Me" and the slogan is "Join Me" He stated that since the Abuja

declaration where 44 Africa heads of state and government committed themselves to eliminating malaria scourge in the continent, remarkable progress has been made in the country in the fight against malaria. He added that painstaking measures were deployed to sustain the fight and these have significantly impacted positively in the reduction of malaria prevalence from 42% in 2013 to 27% in 2015 (NDHS,2015)

He said that in the last one year FMOH in collaboration with partners had distributed a total of twenty-four million, seven hundred and thirty thousand, eight hundred and ninety-six (24,730,896) Long Lasting Insecticidal Nets (LLINs) through mass campaigns in eight states to protect the populace from the scourge of malaria.

The Hon Minister of Health pointed out that the country had gone further to establish three (3) new sentinel sites for vector surveillance in Osun, Niger and Kano states which has increased the number of vector sentinel sites in the country to fourteen (14). He added that a drug efficacy therapeutic test is on-going to assess the efficacy of recommended antimalarial drugs (ACTs, AA, DHP) in seven sites.

The Hon Minister noted that seasonal malaria chemoprevention in the Sahelian region was also conducted to reduce morbidity and mortality among children under five years during peak transmission season in Jigawa, Zamfara, Borno, Sokoto and Jigawa States. This has resulted in reduction in malaria incidence among children under five years of age.

Despite these achievements, the Minister stated, a lot is required to achieve our vision of zero malaria as the World Health Organization has shown a slow down in the progress in the period 2015 to 2017. Based on the WHO 2017 and 2018 World Malaria Reports (WMR,2018) estimated cases have risen from 52.4 million in 2016 to 53.7 million in 2017. Both reports, he said indicated that global progress against malaria had stalled and the world was off track to meet the milestones for 2020 as reflected in the Global Technical Strategy (GTS) for malaria 2016–2030. In addition, he noted, the report further stated that African Region continues to shoulder more than 90% of the global

malaria burden and Nigeria ranks first in the list of African countries with the highest malaria burden, accounting for 25% of global malaria morbidity and mortality. Professor Isaac Adewole said that the federal government is pained by these developments and is working tirelessly to address the issues that resulted in Nigeria being the highest contributor to the global malaria burden.

Consequently, the Hon Minister said plans have been concluded to set up an expert group made up of researchers in the field of malaria to urgently address the issues that led to the surge in malaria burden with a view to reversing the trend as well as bringing Nigeria back on track in the fight against malaria. He added that the National Malaria Strategic Plan (2014-2020) which guides implementation of malaria interventions is being reviewed and when concluded will help in charting the way-forward and bring in new innovations and renewed vigour in efforts to achieve the desired goal.

He used the occasion of the 2019 World Malaria Day to solicit support and commitment of all to keep malaria high on the political agenda, mobilize additional resources, empower communities to take ownership of malaria prevention and buy-in to malaria control interventions and care. He appreciated the press for keeping faith with his ministry over the years and urged them to continue to sensitize the public in all nooks and crannies of Nigeria on malaria, its prevention, management and control. Professor Adewole also appreciated development partners for their unfailing support over the years and solicited for more funds as malaria elimination requires a huge financial and material support to realise. He ended his address by thanking all present for their unalloyed commitment and wished them a successful 2019 WMD commemoration.

The Honourable Minister of Health, Professor Isaac Adewole, FRCOG, DSc (Hon) addressing the press during the Ministerial press briefing of the 2019 WMD

4.0 CHALLENGES AND WAY FORWARD

4.1 Challenges

The major challenges of malaria elimination in Nigeria is insufficient funds to carry out malaria interventions. The budgetary allocation to the health sector is so dismal less than 5%, this is in contrast to WHO's recommendation of 15% of the country annual budget. Additionally, almost all malaria interventions are donor driven and as such it is inadequate to meet the needs of the entire populace hence the gap created as evident in stock out of commodities for instance stock out of RDTs, ACTs, SPs amongst others. In continuation of the challenges faced by malaria elimination in the country is lack of commitment and buy-in by the private sector. The private sector in the country have not been fully involved in malaria hence the huge funding gap in malaria interventions.

4.2 Way-Forward

The 2019 World Malaria day commemoration has a theme which says; “**Zero Malaria starts with Me**” and the slogan is “**Join Me**”. The commemoration aims to draw the attention of Nigerians to that fact that we are off-track in the fight to eliminate malaria globally. This is as a result of decline of funding in malaria interventions as contained in the World Malaria Report of 2018 (WMR,2018). The major concern we are faced now is how to bring Nigeria back on track and reverse the high burden of malaria in the country. Happily, World Health Organisation has recommended some strategies to countries with high malaria burden which Nigeria is top on the list to adopt so as to bring them back on track in the global fight against malaria.

This year’s commemoration seeks to solicit unwavering support and commitment of all Nigerian to rededicate themselves and invest in the universal health care. Similarly, the private sector support is also needed in funding malaria interventions especially the recent WHO’s strategy of “High burden High Impact” approach which is anchored on four pillars namely: - **(a)Political will to reduce malaria deaths, (b) Strategic information to drive impact, (c) Better guidance, policies and strategies and finally (d) a coordinated national malaria response.**

Conclusively, engagement of opinion leaders, individuals and community campaigns like the Zero Malaria Starts with me can be a veritable approach to bring Nigeria back on the global fight against malaria and reverse the ugly trend of malaria burden in the country.

5.0 The Sponsors of the 2019 WMD Commemoration

The 2019 WMD planning committee wishes to express its profound gratitude to all its members who had worked tirelessly for the realisation of this event and the under-listed organisations who provided financial and technical support for the successful commemoration.
